

System Requirements and Download Instructions

System Requirements

The Primary Care Database requires Microsoft Access 97, 2000, or 2002 (XP).

To find out if you have Access on your PC, follow these steps:

1. Click on the Start Menu and select "Programs." If Access is loaded on your PC, you will see "Microsoft Access" listed on the Programs menu.
2. If Access is listed on the menu, select it to run the program.
3. When the program loads, click "Cancel" in the first dialog box.
4. Select "Help" and then "About Microsoft Access" from the menu at the top of the screen. A box should pop up that lists the version of Access that you have.

Download Instructions

1. Click on the appropriate download link on the previous screen.
2. Select "Save this file to disk" and click OK. DO NOT select "Run this file from its current location."
3. Write down the name of the file for future reference.
4. Specify the directory location where you want to save the file and click the Save button. If you are not sure where to save the file, specify C:\My Documents
5. Click the Close button.
6. Start Microsoft Access as explained in steps 1 and 2 in the previous section
7. Click OK in the first dialog box.
8. Specify the directory location and file name from steps 3 and 4 above.
9. Click the Open button.
